Level 4
Network Engineer Apprenticeship

Apprenticeships

Summary

The primary role of a network engineer is to design, install, maintain and support communication networks within an organisation or between organisations. Network engineers need to maintain high levels of operation of communication networks in order to provide maximum performance and availability for their users, such as staff, clients, customers and suppliers.

They will understand network configuration, cloud, network administration and monitoring tools, and be able to give technical advice and guidance. You will have weekly face-to face contact with your college tutor to be fully supported, guided and advised throughout your ap-

Entry Criteria
